

**Master Plan**  
 The focus of this plan is to celebrate the unique natural quality of Hika Park and take advantage of the opportunities offered there. This prime location along a major north/south thoroughfare provides a great opportunity to showcase a beautiful lake front property and create a lasting image of Cleveland, Wisconsin. You can enjoy time with the family in the picnic areas and playground on the south side or walk the boardwalk to experience a rare native ecosystem.

Scale: 1" = 200'

**Master Plan -- Trail System/Passive Space**  
 Scale: 1" = 50'  
**A** This side of the park is for passive enjoyment of nature. It offers wildlife viewing possibilities and educational resources dedicated to the unique ecosystem of Hika Park.

**Master Plan -- Active Park Area**  
 Scale: 1" = 50'  
**B** This side of the park is for active play and social gathering. It offers entertainment possibilities for the whole family as well as a linkage to the trail system throughout the rest of Hika Park.

**Typical Wooded Trail:** ADA accessible trail. The path highlights the beach/swale ecosystem.

**Typical Boardwalk Trail:** Follows the line of transition between swale and dune/beach areas.

**1 Park Entrance:** Overt location to draw attention. Island made of the stone pile currently near beach. Permeable pavers with sand and suitable grasses to extend feel of beach.

**2 Fishin' Hole:** This area is found on the west side of Lakeshore Dr. After the removal of silt, riverbank vegetation and boulders could be added for an improved fish habitat.

**3 Meadow Trail:** This area would be a major feature of the passive side of the park. Would allow for quiet introspection and provide opportunities for wildlife viewing and interaction.

**4 Single Track Wooded Trail:** This trail system would be found away from the main beach area, they would not be ADA accessible. Constructed of rustic timbers and boards.

**5 Beach Overlook:** This area would be a large node near the middle of the boardwalk. It would have benches, interpretive signage and offer a fantastic view of Lake Michigan.

**6 River Crossing:** The bridge would link 2 activity areas into 1. It would also link the dock and boat parking with the rest of the park. Constructed of rustic timbers and boards.
